Office Action Summary	Application No. 10/735,233	Applicant(s) GEHRIG ET AL.	
	Examiner Tan Le	Art Unit 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first office action for Application No. 10/735,233, filed 12/12/03. This application contains 7 claims numbered 1-7.

Preliminary amendment filed 10/32/07 has been entered.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 4/26/07 is acknowledged. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Objections

Claim 4 is objected to because "the optical glass" is drawn into the claim while the optical glass does not appear to be of the claimed invention (see the preamble). This also raises a question of whether the subcombination of the glass holder alone or the combination of the glass holder and optical glass is being claimed. The examiner considers claim 4 drawn to the combination of holder device and the optical glass for examination purposes.

Claim 1 recites "the axis" of the body" (last line) lacks of antecedent basis.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent no. 5,511,705 to Dreszer.

Dreszer teaches an interchangeable tool and fastener carrying and storage system, which includes holder grips 44, 48, 50, 52, an axially elongated bar (6 or 7) for supporting the holder grips, and a frame 30 for supporting the bar horizontally, wherein the bar (6, 7) includes a series of evenly spaced positioning notches (36) for removably mounting a respective plurality of holder grips to the bar and next to one another. The holder grip comprises an axially elongated body having opposite upper and lower end portions, the upper end portion including hanging means (U-shaped -hook) for joining the holder grip in a removable way to a respective notch 36 in the bar (6, 7) and locking means (considers an distal end of the U-shaped hook bending inward and snap-fit in the notch constituting a lock) for preventing free rotation of the holder grip relative to the bar; and holding means (considers lower portion of frame 30 and 40 and 42) in substantially vertical relation and parallel to an axis of the body.

Dreszer discloses the elongated bar 6 or 7 generally in rectangular shape with notches, but not a cylindrical shape. However, Applicant has not disclosed that having

Art Unit: 3632

the elongated bar in cylindrical shape solves any stated problem or for any particular purpose. It appears that the elongated bar of rectangular shape would perform equally well with the elongated bar of any other shapes. Accordingly, the use of elongated bar of cylindrical shape is deemed to be a designed consideration which fail to patentably distinguish over the prior art of Dreszer.

Allowable Subject Matter

Claims 3-7 are objected to but would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
